**Key Urban Housing of the Twentieth Century: Plans, Sections and Elevations (Key Architecture Series)** By Hilary French

**The design of multiple housing – a new building type, especially for growing urban populations – was a major new area of activity for architects at the beginning of the twentieth century, and one that continues into the twenty-first century.**

This book features some ninety of the most influential modern housing designs of the last hundred years by some of the best-known architects in the field. Each project is explained with a concise text and photographs and specially created scale drawings, including floor plans and site plans, sections and elevations where appropriate. The projects are organized in six roughly chronological chapters tracing the history of both public and private housing around the world.

The detailed drawings allow each project to be analyzed in depth, which, alongside the author's authoritative text, will make this an invaluable resource for architects and students. As an added bonus, the book includes a CD-ROM containing digital files of all the drawings featured in the book.

150 color photographs; 500 line drawings

### Editorial Review

#### Review

“[W]ell-designed, knowledgeable work which will be valuable in architecture courses and for students and professionals in architecture.”

- **Book News**

“[W]orthwhile tool for developers and architects as they endeavor to understand the underpinnings of urban housing and look towards the future generations of urban projects. The premise and format of *Key Urban Housing of the Twentieth Century* is simple yet noteworthy, and the execution is compelling.”

- **Howard Kozloff, Director of Operations in New York for Hart Howerton**

#### About the Author

Hilary French heads the School of Architecture & Design at the Royal College of Art, London.

### Users Review
