The Storytelling Animal: How Stories Make Us Human By Jonathan Gottschall

A New York Times Editor's Choice

A Los Angeles Times Book Prizes Finalist

"A jaunty, insightful new book . . . [that] draws from disparate corners of history and science to celebrate our compulsion to storify everything around us."

--*New York Times*

Humans live in landscapes of make-believe. We spin fantasies. We devour novels, films, and plays. Even sporting events and criminal trials unfold as narratives. Yet the world of story has long remained an undiscovered and unmapped country. Now Jonathan Gottschall offers the first unified theory of storytelling. He argues that stories help us navigate life's complex social problems--just as flight simulators prepare pilots for difficult situations. Storytelling has evolved, like other behaviors, to ensure our survival. Drawing on the latest research in neuroscience, psychology, and evolutionary biology, Gottschall tells us what it means to be a storytelling animal and explains how stories can change the world for the better. We know we are master shapers of story. *The Storytelling Animal* finally reveals how stories shape us.

"This is a quite wonderful book. It grips the reader with both stories and stories about the telling of stories, then pulls it all together to explain why storytelling is a fundamental human instinct."

--Edward O. Wilson

"Charms with anecdotes and examples . . . we have not left nor should we ever leave Neverland."--*Cleveland Plain Dealer*

Jonathan Gottschall on *The Storytelling Animal*

What is the storytelling animal?

Only humans tell stories. Story sets us apart. For humans, story is like gravity: a field of force that surrounds us and influences all of our movements. But, like gravity, story is so omnipresent that we are hardly aware of how it shapes our lives. I wanted to know what science could tell us about humanity's strange, ardent love affair with story.

What inspired you to write this book?

I was speeding down the highway on a gorgeous autumn day, cheerfully spinning through the FM dial, and a country music song came on. My normal response to this sort of catastrophe is to turn the channel as quickly as possible. But that day, for some reason, I decided to listen. In "Stealing Cinderella," Chuck Wicks sings about a young man asking for his sweetheart's hand in marriage. The girl's father makes the young man wait in the living room, where he notices photos of his sweetheart as a child, "She was playing Cinderella/ She was riding her first bike/ Bouncing on the bed and looking for a pillow fight/ Running through the sprinkler/ With a big popsicle grin/ Dancing with her dad, looking up at him. . ." And the young man suddenly realizes that he is taking something precious from the father: he is stealing Cinderella. Before the song was over I was crying so hard that I had to pull off the road. I sat there for a long time feeling sad about my own daughters growing up to abandon me. But I was also marveling at how quickly Wicks's small, musical story had melted me into sheer helplessness. I wrote the book partly in an effort to understand what happened to me that day.

But don't you worry that science could explain away the magic of story?

I get this question a lot. The answer is "No! A thousand times, no!" Science adds to wonder; it doesn't dissolve it. Scientists almost always report that the more they discover about their subject, the more lovely and mysterious it becomes. That's certainly what I found in my own research. The whole experience left me in awe of our species--of this truly odd primate that places story (and other forms of art) at the very center of its existence.

Children come up a lot in this book, including your own children. . .

Yes, I spent a lot of time observing my two daughters (in this I took my cue from Darwin, who was a doting father, but not shy about collecting observational data on his large brood). I got lucky. My girls happened to be 4 and 7 during the main period that I was working on my book. This is the golden period of children's pretend play. And I was able to observe them spontaneously creating these fantastic wonder-worlds, with

these elaborate and dangerous plots. I noticed that my girls spent almost all of their awake time in various kinds of make-believe. And I was invited to enter those worlds myself, to play the roles of princes and Ken dolls and monsters. I learned a lot about the nature of story from my girls. Story and other forms of art are often seen as products of culture. But this perspective is one-sided. Story blooms naturally in a child--it is as effortless and reflexive as breathing.

Are dreams a form of storytelling?

Yes, they are. Dreams are, like children's make-believe, a natural and reflexive form of storytelling. Researchers conventionally define dreams as "intense sensorimotor hallucinations with a narrative structure." Dreams are, in effect, night stories: they focus on a protagonist--usually the dreamer--who struggles to achieve desires. Researchers can't even talk about dreams without dragging in the basic vocabulary of English 101: plot, theme, character, scene, setting, point of view, perspective. The most conservative estimates suggest that we dream in a vivid, story-like way for more than six solid years out of a seventy-year lifespan. So dreams are definitely part of the evolutionary riddle of storytelling.

What is the future of story?

In the digital age, people are reading less fiction, but this is because they've found new ways to jam extra story into their lives--on average we watch five hours of TV per day, listen to hours of songs, and spend more and more time playing story-centric video games. I think we are seeing, in video games, the birth of what will become the 21st century's dominant form of storytelling. The fantasy lands of online games like World of Warcraft attract tens of millions of players, who spend an average of 20–30 hours per week adventuring in interactive story. Players describe the experience of these games as "being inside a novel as it is being written." In upcoming decades, as computing power increases exponentially, these virtual worlds are going to become so attractive that we will be increasingly reluctant to unplug. So the real danger isn't that story will disappear from our lives. It is that story will take them over completely.

Review

A **jaunty and insightful** new book...[that] celebrate[s] our compulsion to storify everything around us. (New York Times Sunday Book Review, *Editor's Choice*)

"[An] **insightful yet breezily accessible exploration of the power of storytelling and its ability to shape our lives...[that is] packed with anecdotes and entertaining examples from pop culture.**" **The Boston Globe**

"*The Storytelling Animal* is **informative, but also a lot of fun....** Anyone who has wondered why stories affect us the way they do will find **a new appreciation of our collective desire to be spellbound in this fascinating book.**" **BookPage**

"Stories are the things that make us human, and this book's **absorbing, accessible blend of science and story** shows us exactly why." **Minneapolis Star Tribune.**

"This is a work of popular philosophy and social theory written by an **obviously brilliant** undergraduate teacher. The gift for the example is everywhere. A punchy line appears on almost every page." **The San Francisco Chronicle**

"A **jaunty and insightful** new book...[that] celebrate[s] our compulsion to storify everything around us.

—*New York Times Sunday Book Review, Editor's Choice*

"[An] **insightful yet breezily accessible exploration of the power of storytelling and its ability to shape our lives...[that is] packed with anecdotes and entertaining examples from pop culture.**" —**The Boston Globe**

"*The Storytelling Animal* is **informative, but also a lot of fun....** Anyone who has wondered why stories affect us the way they do will find **a new appreciation of our collective desire to be spellbound in this fascinating book.**" **BookPage**

"Stories are the things that make us human, and this book's **absorbing, accessible blend of science and story** shows us exactly why." —**Minneapolis Star Tribune.**

"This is a work of popular philosophy and social theory written by an **obviously brilliant** undergraduate teacher. The gift for the example is everywhere. A punchy line appears on almost every page." —**The San Francisco Chronicle**

"**A lively pop-science overview of the reasons why we tell stories and why storytelling will endure..[Gottschall's] snapshots of the worlds of psychology, sleep research and virtual reality are larded with sharp anecdotes and jargon-free summaries of current research... Gottschall brings a light touch to knotty psychological matters, and he's a fine storyteller himself.**"
—**Kirkus Reviews**

"They say we spend multiple hours immersed in stories every day. Very few of us pause to wonder why. Gottschall lays bare this quirk of our species with deft touches, and he finds that our love of stories is its own story, and one of the grandest tales out there—the story of what it means to be human."
—**Sam Kean**, author of *The Disappearing Spoon: And Other True Tales of Madness, Love, and the History of the World from the Periodic Table of the Elements*

"Story is not the icing, it's the cake! Gottschall eloquently tells you 'how come' in his well researched new book."
—**Peter Guber**, CEO, Mandalay Entertainment and author of the #1 New York Times bestseller, *Tell To Win*

"This is a quite wonderful book. It grips the reader with both stories and stories about the telling of stories, then pulls it all together to explain why storytelling is a fundamental human instinct."
—**Edward O. Wilson**, **University Research Professor and Honorary Curator in Entomology, Harvard University**

"*The Storytelling Animal* is a delight to read. It's boundlessly interesting, filled with great observations and clever insights about television, books, movies, videogames, dreams, children, madness, evolution, morality, love, and more. And it's beautifully written—fittingly enough, Gottschall is himself a skilled storyteller."
— **Paul Bloom**, **Professor of Psychology at Yale and author of *How Pleasure Works***

"Like the magnificent storytellers past and present who furnish him here with examples and inspiration, Jonathan Gottschall takes a timely and fascinating but possibly forbidding subject — the new brain science and what it can tell us about the human story-making impulse — and makes of it an extraordinary and absorbing intellectual narrative. The scrupulous synthesis of art and science here is masterful; the real-world

stakes high; the rewards for the reader numerous, exhilarating, mind-expanding."

— **Terry Castle, Walter A. Haas Professor in the Humanities, Stanford University**

From reader reviews:

Donald McLaughlin:

Here thing why this The Storytelling Animal: How Stories Make Us Human are different and trustworthy to be yours. First of all looking at a book is good however it depends in the content of computer which is the content is as delicious as food or not. The Storytelling Animal: How Stories Make Us Human giving you information deeper and in different ways, you can find any guide out there but there is no publication that similar with The Storytelling Animal: How Stories Make Us Human. It gives you thrill reading journey, its open up your own personal eyes about the thing in which happened in the world which is maybe can be happened around you. You can actually bring everywhere like in park your car, café, or even in your approach home by train. Should you be having difficulties in bringing the printed book maybe the form of The Storytelling Animal: How Stories Make Us Human in e-book can be your choice.

Michael Griffin:

The publication untitled The Storytelling Animal: How Stories Make Us Human is the e-book that recommended to you to read. You can see the quality of the reserve content that will be shown to you. The language that publisher use to explained their ideas are easily to understand. The copy writer was did a lot of exploration when write the book, therefore the information that they share for your requirements is absolutely accurate. You also could get the e-book of The Storytelling Animal: How Stories Make Us Human from the publisher to make you considerably more enjoy free time.

Robert Delaney:

Often the book *The Storytelling Animal: How Stories Make Us Human* has a lot of knowledge on it. So when you make sure to read this book you can get a lot of gain. The book was published by the very famous author. The writer makes some research prior to write this book. This particular book very easy to read you can get the point easily after reading this book.

Rodney Natale:

As a student exactly feel bored for you to reading. If their teacher asked them to go to the library in order to make summary for some book, they are complained. Just very little students that has reading's internal or real their pastime. They just do what the educator want, like asked to go to the library. They go to generally there but nothing reading really. Any students feel that reading is not important, boring and can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this *The Storytelling Animal: How Stories Make Us Human* can make you really feel more interested to read.
