### Editorial Review

From School Library Journal

PreS-Gr 2—Beginning with a beautiful fall through a rainbow, the title character takes the journey from the beginning to the end of the water cycle. Gray delivers a complex scientific process in an approachable way through well-chosen words while Kolanovic's illustrations are superbly suited for the story. The raindrop's adventures are documented in soft pastels displaying the beauty of Earth's rainbow, streams, rivers, and oceans, while he encounters a variety of birds, bunnies, worms, moose, bears, and aquatic life. The raindrop makes his way ultimately to the ocean shore, to be evaporated back up into the sky and begin the voyage all over again. While not nonfiction, this title would make a great introduction to nature units covering forms of precipitation or types of bodies of water. Additionally, with the smoothly flowing story and picturesque illustrations sweeping across the spreads, it would make a fine read-aloud as well. Just like water in real life, the little raindrop can make a big impact on his readers.—John Trischitti, Midland County Public Libraries, TX
