Editorial Review

Review

"An attractive and appreciated aspect of this book is Bruun's balanced approach. Skillfully the book demonstrates that modelling is a prerequisite for better public transport, but at the same time it warns against the implications of using sophisticated models." – *Moshe Givoni, Transport Reviews, Tel-Aviv University, Israel*

"This is a very useful book, offering guidance on the planning and evaluation of major new public transit projects, and will be of interest for undergraduate and postgraduate students, academics and practitioners. It covers many important dimensions not previously brought together in one publication, including route and network analysis, modesplit estimation, space requirements, cost modelling and contract models." - *Robin Hickman, University College London, Urban Studies*

About the Author

Eric Christian Bruun currently teaches transportation engineering, planning, and modeling at Aalto University in Finland and is a guest lecturer at other universities. He has managed and participated in numerous international consulting projects. Eric has Bachelor and Master of Science degrees in Mechanical Engineering from the University of Washington and a PhD in Systems Engineering from the University of Pennsylvania.

Users Review

From reader reviews:

Roberta Bourland:

In this 21st centuries, people become competitive in most way. By being competitive right now, people have do something to make these survives, being in the middle of the actual crowded place and notice simply by surrounding. One thing that at times many people have underestimated it for a while is reading. Sure, by reading a book your ability to survive enhance then having chance to stay than other is high. For yourself who want to start reading a new book, we give you this kind of Better Public Transit Systems: Analyzing Investments and Performance book as nice and daily reading publication. Why, because this book is greater than just a book.

Amy Nichols:
