Biafra: The Nigerian Civil War 1967-1970 (Africa @ War Series) By Peter Baxter

Nigeria was a unique concept in the formation of modern Africa. It began life as a highly lucrative if climatically challenging holding of the Royal Niger Company, a British Chartered Company under the control of Victorian capitalist Sir George Taubman Goldie. It was handed over to indigenous rule in 1960 with the best of intentions and a profound hope on the part of the British Crown that it would become the poster child of successful political transition in Africa.

It did not. One of the signature failures of imperial strategists at the turn of the 19th century was to take little if any account of the traditional demographics of the territories and societies that were subdivided, and often joined together, into spheres of foreign influence, later evolving into colonies, and finally into nation states. Many of the signature crises in postcolonial Africa have owed their origins to this very phenomenon: incompatible and mutually antagonistic tribal and ethnic groupings forced to cohabit within the indivisible precincts of political geography. Congo, Rwanda/Burundi, Sudan and many others have suffered ongoing attrition within their borders as historic enmities surge and boil in restless and ongoing violence.

Such was the case with Nigeria in the post-independence period. The traditions and practices of the Islamic north and the Christian/Animist south, and even within the multiplicity of ethnic division in the south itself, proved to be impossible to reconcile. The result was an immediate centrifuge away from the center, complicated by the vast infusion of oil revenues and the inevitable explosion of corruption that followed. All of this created the alchemy of civil war and genocide, which erupted into violence in 1967 as the eastern region of Nigeria attempted to secede. The war that followed shocked the conscience of the world, and revealed for the first time the true depth of incompatibility of the four partners in the Nigerian federation.

This book traces the early history of Nigeria from inception to civil war, and the complex events that defined the conflict in Biafra, revealing how and why this awful event played out, and the scars that it has since left on the psyche of the disunited federation that has continued to exist in the aftermath.

Editorial Review

Review

"Among mid-20th-century, post-colonial crises, the Nigerian Civil War, author Peter Baxter correctly contends, "was the second high-profile, post-independence conflict in Africa". Now it dominates the 16th installment in Helion's splendid "Africa@War" series: Biafra. Subtitled "The Nigerian Civil War 1967-1970", the compact, 72-page study competently chronicles the conflict. Contents commence with a practical précis of Nigerian colonial history – in which ethnicity, religion and oil naturally play key, continuing roles. Resist temptation to skip these background summaries: they explain much. With independence, Nigeria's federal structure did, indeed, prove tenuous. In the wake of the July 1966 counter-coup to that year's January uprising, wholesale slaughter of Ibos accelerated succession. And Lt Col Chukwuemeka Odumegwu-Ojukwu, Eastern region military governor, declared the sovereign Republic of Biafra 30 May 1967. The Nigerian Civil War had begun. Baxter traces the total tale, beginning with the immediate run-up to war – dramatis personae and the Aburi Conference. Early Nigerian military actions, Biafra's audacious Operation Torch and the inevitable, almost plodding Federal strangulation follow. No coverage would be complete without Nigeria's use of starvation as a weapon. And Baxter dutifully distills clandestine international relief – and gun-running – efforts to Biafra. Photos, maps, acronym glossary and annotations augment text. And a handy conclusion and endnotes complete coverage. For a pithy précis on the Nigerian Civil War, grab this convenient chronicle. Recommended!" (*Cybermodeler*)
