**Numbers, Groups and Codes** By *J. F. Humphreys, M. Y. Prest*

The aim of this textbook is to introduce the concepts of algebra via examples and to relate them to their applications, particularly in computer sciences. It can be used to teach courses that bridge the widening gap between school and university. In order to give a definite shape to the material, topics that develop elementary group theory are included. The choice of topics is motivated by the wish to provide a sound, rigorous and historically relevant introduction to group theory. Studying group theory in this way enables the student to recognize mathematical patterns in other areas, some traditional, others not so. The book has developed from first level courses taught in the UK and USA. These courses proved successful in developing not only a theoretical understanding but also algorithmic skills.

## **Editorial Review**

### **Review**

'... very suitable for a class with many students interested in combinatorics, computer science, or engineering ... This book merits a close look because of its pedagogical strengths. One might say this book really is about 'How to think about mathematics'. And that is a great virtue ... The book is sprinkled with historical and other motivations ... The history is natural, fits, and flows with the exposition ... a very useful text on abstract algebra.' MAA Online - The Mathematical Association of America

## **Users Review**

### **From reader reviews:**

#### **Alexandra Dickey:**

This Numbers, Groups and Codes book is just not ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book is definitely information inside this reserve incredible fresh, you will get data which is getting deeper a person read a lot of information you will get. This kind of Numbers, Groups and Codes without we know teach the one who reading it become critical in contemplating and analyzing. Don't be worry Numbers, Groups and Codes can bring any time you are and not make your bag space or bookshelves' come to be full because you can have it in the lovely laptop even mobile phone. This Numbers, Groups and Codes having very good arrangement in word along with layout, so you will not experience uninterested in reading.

#### **Angela Thomas:**

Reading a book tends to be new life style within this era globalization. With examining you can get a lot of information that may give you benefit in your life. With book everyone in this world can certainly share their idea. Guides can also inspire a lot of people. A great deal of author can inspire their reader with their story or even their experience. Not only the storyplot that share in the ebooks. But also they write about advantage about something that you need case in point. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book which exist now. The authors on this planet always try to improve their talent in writing, they also doing some exploration before they write with their book. One of them is this Numbers, Groups and Codes.

#### **Marilyn Perez:**

Do you like reading a e-book? Confuse to looking for your selected book? Or your book was rare? Why so many problem for the book? But any kind of people feel that they enjoy regarding reading. Some people

likes examining, not only science book but in addition novel and Numbers, Groups and Codes or even others sources were given information for you. After you know how the truly great a book, you feel need to read more and more. Science guide was created for teacher as well as students especially. Those ebooks are helping them to increase their knowledge. In different case, beside science reserve, any other book likes Numbers, Groups and Codes to make your spare time considerably more colorful. Many types of book like this one.

**Jacqueline Britt:**

Reading a publication make you to get more knowledge from that. You can take knowledge and information from your book. Book is prepared or printed or descriptive from each source which filled update of news. In this particular modern era like currently, many ways to get information are available for an individual. From media social such as newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Do you want to spend your spare time to spread out your book? Or just in search of the Numbers, Groups and Codes when you essential it?
