Editorial Review

Review

This may not be a comfortable book to read, but every veterinary surgeon in practice should have a copy on their shelves, and it ought to be essential reading for new graduates. It deals specifically with non-accidental injury to animals. The text is attractively laid out and well illustrated with full colour pictures and line diagrams. The first pathology textbook dedicated to non-accidental injury in animals in the UK. **Veterinary Record, February 2009**

"The senior author's experience in this field is very apparent from both the text and the images...This is a useful addition to forensic literature. It should be available to any veterinary surgeon who is involved in legal cases where cruelty or unlawful killing is alleged."

Veterinary Practice, June 2010

"The book, written by a husband-and-wife team of veterinary pathologists with many years' experience of assessing accidental animal injury, is indeed a gourmet sandwich. It is the text that many established veterinary pathologists have been waiting for, particularly those who may be engaged in or likely to encounter forensic and legal veterinary pathology." **The Bulletin, July 2009**

Users Review

From reader reviews:

Pearl Sanders:

Why don't make it to be your habit? Right now, try to prepare your time to do the important take action, like looking for your favorite e-book and reading a book.
