Biopolymers: Processing and Products (Plastics Design Library) By Michael Niaounakis

Biopolymers and biodegradable plastics are finding new applications in various sectors, from packaging, to medical, automotive and many more. As synthetic plastics are increasingly replaced by their bioplastic equivalents, engineers are facing new challenges including processing, costs, environmental sustainability and – ultimately – developing successful products.

Biopolymers: Processing and Products, the second book of a trilogy dedicated to biopolymers, gives a detailed insight into all aspects of processing, seamlessly linking the science of biopolymers to the latest trends in the development of new products. Processes covered in the book include blending, compounding, treatment, and shaping, as well as the formation of biocomposites. Biopolymer coatings and adhesives are also investigated.

This book unique in its coverage contains information retrieved mainly from patents, which form the bulk of the book. The coverage of processing will help engineers and designers to improve output and efficiency of every stage of the product development process, and will form an indispensable tool in selecting the right biopolymer and processing technique for any given application, covering medical, automotive, food packaging and more. It will assist also engineers, material scientists and researchers to improve existing biopolymer processes and deliver better products at lower cost.

- Multi-disciplinary approach and critical presentation of all available processing techniques and new products of biopolymers
- Contains information not to be found in any other book
- Self-contained chapters

Editorial Review

About the Author

European Patent Office, Rijswijk, Netherlands

Users Review

From reader reviews:

Beatrice Raybon:

Inside other case, little folks like to read book Biopolymers: Processing and Products (Plastics Design Library). You can choose the best book if you love reading a book. Provided that we know about how is important a book Biopolymers: Processing and Products (Plastics Design Library). You can add knowledge and of course you can around the world by a book. Absolutely right, due to the fact from book you can know everything! From your country till foreign or abroad you will be known. About simple matter until wonderful thing it is possible to know that. In this era, we are able to open a book or searching by internet unit. It is called e-book. You need to use it when you feel bored stiff to go to the library. Let's read.

Cindi Russell:

Reading a book can be one of a lot of action that everyone in the world likes. Do you like reading book and so. There are a lot of reasons why people enjoy it. First reading a e-book will give you a lot of new information. When you read a book you will get new information because book is one of several ways to share the information or their idea. Second, reading through a book will make a person more imaginative. When you studying a book especially fictional works book the author will bring you to imagine the story how the characters do it anything. Third, you could share your knowledge to other folks. When you read this Biopolymers: Processing and Products (Plastics Design Library), you can tells your family, friends and also soon about yours publication. Your knowledge can inspire others, make them reading a book.

Rebecca Moreno:

Within this era which is the greater man or who has ability to do something more are more precious than other. Do you want to become one of it? It is just simple way to have that. What you should do is just spending your time almost no but quite enough to experience a look at some books. One of many books in the top list in your reading list will be Biopolymers: Processing and Products (Plastics Design Library). This book which can be qualified as The Hungry Hillsides can get you closer in growing to be precious person. By looking way up and review this e-book you can get many advantages.

Phillip Elliott:

As we know that book is very important thing to add our knowledge for everything. By a guide we can know everything we want. A book is a list of written, printed, illustrated or maybe blank sheet. Every year had been exactly added. This guide Biopolymers: Processing and Products (Plastics Design Library) was filled in relation to science. Spend your extra time to add your knowledge about your technology competence. Some people has distinct feel when they reading a new book. If you know how big good thing about a book, you can really feel enjoy to read a e-book. In the modern era like now, many ways to get book that you wanted.
