Editorial Review

From the Author

Based on my hugely successful Internet video courses, in this series of books I have split each subject covered into a series of 20 self-contained lessons. Each one should take you no longer than an hour to complete, and there is a set of ten questions at the end of every lesson (with answers at the back of the book) so that you can test whether you have learned the essentials covered in that lesson.

Fully tested and working examples are used throughout, so you can clearly see how the technologies work, and either type them in or download them for free from 20lessons.com, so you can try them out for yourself, and play with them too. On top of that I also produced an instruction video for every lesson, taking you through all the topics in the lesson, and describing the examples and how they work from start to finish - instructions on how to view them are given in each chapter.

By combining all these methods (text, examples, Q&As, and video) you can be sure that the knowledge you need to know is quickly acquired, and you will gain a clear overview from different angles, ensuring that you know how to apply this knowledge in the real world.

About the Author

Robin Nixon is an experienced web developer, author, and teacher, with over 30 years' experience. He has written more than 500 articles and almost 30 books, including *The Web Developer's Cookbook*, *HTML5 for iOS and Android: A Beginner's Guide*, *Plug-In CSS*, *Plug-In JavaScript*, and *Plug-In PHP*.

Users Review

From reader reviews:

Robert Nguyen:
