The Time Machine (Dover Thrift Editions) By H. G. Wells

English novelist, historian and science writer Herbert George Wells (1866–1946) abandoned teaching and launched his literary career with a series of highly successful science-fiction novels. The Time Machine was the first of a number of these imaginative literary inventions. First published in 1895, the novel follows the adventures of a hypothetical Time Traveller who journeys into the future to find that humanity has evolved into two races: the peaceful Eloi — vegetarians who tire easily — and the carnivorous, predatory Morlocks.

After narrowly escaping from the Morlocks, the Time Traveller undertakes another journey even further into the future where he finds the earth growing bitterly cold as the heat and energy of the sun wane. Horrified, he returns to the present, but soon departs again on his final journey.

While the novel is underpinned with both Darwinian and Marxist theory and offers fascinating food for thought about the world of the future, it also succeeds as an exciting blend of adventure and pseudo-scientific romance. Sure to delight lovers of the fantastic and bizarre, The Time Machine is a book that belongs on the shelf of every science-fiction fan.

Editorial Review

From School Library Journal

Grade 7 Up-H.G. Wells' classic begins at an English dinner party where a group of gentlemen are discussing the device that one of them is making so he can explore the fourth dimension. No one is identified by name but when the men gather the following week, the device's inventor, referred to as Time Traveler, is strangely absent. When he arrives later, he recounts his amazing sojourn into the future. Most of this 1895 novella deals with Time Traveler's stay in a world where dark forces lurk behind an idyllic exterior. After narrowly escaping from a forest fire and hostile creatures, Time Traveler uses his invention to investigate other time periods before returning to share his story with his friends. Despite the fact that he has returned with never-before-seen flowers, most of his companions do not believe him. When one of the dinner guests stops by Time Traveler's home a few days later, he is the last one to see the inventor before he and his Time Machine disappear. Ralph Cosham narrates this science fiction standard bearer with a controlled intensity that gives the story the feel of a modern drama. Add to that Welles' ability to predict some contemporary scenarios, and this recording will interest 21st century listeners. With a sturdy case and continual tracking every three minutes, this production will be a useful addition to school and public libraries that want to add classics to their science fiction holdings.
