Environmental Science By William Cunningham, Mary Cunningham

Environmental Science: A Global Concern is a comprehensive presentation of environmental science for non-science majors which emphasizes critical thinking, environmental responsibility, and global awareness. This book is intended for use in a one or two-semester course in environmental science, human ecology, or environmental studies at the college or advanced placement high school level. As practicing scientists and educators, the Cunningham author team brings decades of experience in the classroom, in the practice of science, and in civic engagement. This experience helps give students a clear sense of what environmental science is and why it matters in this exciting, new 13th edition.

Environmental Science: A Global Concern provides readers with an up-to-date, introductory global view of essential themes in environmental science. The authors balance evidence of serious environmental challenges with ideas about what we can do to overcome them. An entire chapter focuses on ecological restoration; one of the most important aspects of ecology today. Case studies in most chapters show examples of real progress, and “What Can You Do?” lists give students ideas for contributing to solutions.

Editorial Review

About the Author

Mary Ann Cunningham teaches geography and geographic information systems (GIS), and environmental studies at Vassar College, Poughkeepsie, NY. Her research involves using GIS to assess landscape-level problems in conservation and biodiversity. In particular, she is interested in understanding the nature of fragmentation in grassland environments and the effects of fragmentation on the make-up of bird communities. The agricultural landscapes where she has been working represent a complex and fascinating interaction of issues concerning working landscapes, resource use, remnant wildlife habitat, and landscape aesthetics. It is at the intersection of these issues that she likes to try and understand the geography of physical environments. Mary Ann earned a PhD in Geography at the University of Minnesota, an MA in Geography at the University of Oregon, and a BA in Geology at Carleton College.

William Cunningham is an Emeritus Professor at the University of Minnesota where he taught for 36 years in the Departments of Botany and Genetics and Cell Biology as well as the Conservation Biology Program, the Institute for Social, Economic, and Ecological Sustainability, the Center for Environmental Learning and Leadership, and the McArthur Program in Global Change. He received his Ph.D. in Botany from the University of Texas in 1963 and spent two years at Purdue University as a postdoctoral fellow. At various times, he has been a visiting scholar in Sweden, Norway, Indonesia, and China, as well as several universities and research institutions in the United States.

Dr. Cunningham has devoted himself to education and teaching development at the undergraduate level in biology. He began his educational career in structural biology but for the last 10-15 years has concentrated on environmental science, teaching courses such as Social Uses of Biology; Garbage, Government, and the Globe; Environmental Ethics; and Conservation History. Within the past four years, he has received both of the two highest teaching honors that the University of Minnesota bestows -- The Distinguished Teaching Award and a \$15,000 Amoco Alumni Award. He has served as a Faculty Mentor for younger faculty at the university, sharing the knowledge and teaching skills that he has gained during his distinguished career.

Users Review

From reader reviews:

Tenesha Little:

Book is written, printed, or descriptive for everything. You can learn everything you want by a publication. Book has a different type. To be sure that book is important thing to bring us around the world. Close to that you can your reading ability was fluently. A publication Environmental Science will make you to possibly be smarter. You can feel a lot more confidence if you can know about everything. But some of you think that open or reading some sort of book make you bored. It's not make you fun. Why they can be thought like that? Have you trying to find best book or suited book with you?

Rosalie Lloyd:

This Environmental Science is great publication for you because the content and that is full of information for you who have always deal with world and get to make decision every minute. That book reveal it data accurately using great plan word or we can point out no rambling sentences in it. So if you are read it hurriedly you can have whole details in it. Doesn't mean it only gives you straight forward sentences but challenging core information with wonderful delivering sentences. Having Environmental Science in your hand like keeping the world in your arm, details in it is not ridiculous a single. We can say that no e-book that offer you world throughout ten or fifteen moment right but this guide already do that. So , this is good reading book. Hey Mr. and Mrs. stressful do you still doubt in which?

Scott Bourquin:

Do you like reading a book? Confuse to looking for your best book? Or your book ended up being rare? Why so many question for the book? But just about any people feel that they enjoy for reading. Some people likes reading, not only science book but additionally novel and Environmental Science or others sources were given expertise for you. After you know how the good a book, you feel would like to read more and more. Science publication was created for teacher as well as students especially. Those textbooks are helping them to add their knowledge. In additional case, beside science book, any other book likes Environmental Science to make your spare time far more colorful. Many types of book like this one.

Carolyn Hoar:

E-book is one of source of expertise. We can add our expertise from it. Not only for students but in addition native or citizen want book to know the update information of year for you to year. As we know those ebooks have many advantages. Beside we add our knowledge, could also bring us to around the world. Through the book Environmental Science we can consider more advantage. Don't that you be creative people? To become creative person must like to read a book. Simply choose the best book that acceptable with your aim. Don't become doubt to change your life by this book Environmental Science. You can more inviting than now.
