Intelligent Collaborative e-Learning Systems and Applications (Studies in Computational Intelligence) From Brand: Springer

Intelligent Collaborative e-Learning Systems and Applications is a major research theme in CSCL and CSCW research community. It comprises a variety of research topics that focus on developing systems that are more powerful and flexible and also more adaptable to the learning process and thus provide better answers to the paradigmatic principles of on-line collaborative learning and work. The chapters collected in this book provide new insights, findings and approaches both on the analysis and the development of more powerful e-collaboration settings. Researchers will find in this book the latest trends in these research topics. On the other hand, academics will find practical insights on how to use conceptual and experimental approaches in their daily tasks. Finally, developers from CSCL community can be inspired and put in practice the proposed models and evaluate them for the specific purposes of their own work and context.

Editorial Review

From the Back Cover

Intelligent Collaborative e-Learning Systems and Applications is a major research theme in CSCL and CSCW research community. It comprises a variety of research topics that focus on developing systems that are more powerful and flexible and also more adaptable to the learning process and thus provide better answers to the paradigmatic principles of on-line collaborative learning and work. The chapters collected in this book provide new insights, findings and approaches both on the analysis and the development of more powerful e-collaboration settings. Researchers will find in this book the latest trends in these research topics. On the other hand, academics will find practical insights on how to use conceptual and experimental approaches in their daily tasks. Finally, developers from CSCL community can be inspired and put in practice the proposed models and evaluate them for the specific purposes of their own work and context.

Users Review

From reader reviews:

John Pierre:

The book Intelligent Collaborative e-Learning Systems and Applications (Studies in Computational Intelligence) make one feel enjoy for your spare time. You may use to make your capable far more increase. Book can being your best friend when you getting strain or having big problem with the subject. If you can make reading through a book Intelligent Collaborative e-Learning Systems and Applications (Studies in Computational Intelligence) to be your habit, you can get far more advantages, like add your own personal capable, increase your knowledge about a few or all subjects. You may know everything if you like start and read a publication Intelligent Collaborative e-Learning Systems and Applications (Studies in Computational Intelligence). Kinds of book are several. It means that, science publication or encyclopedia or some others. So , how do you think about this book?

Lorraine Paisley:

Book is to be different for each grade. Book for children until finally adult are different content. As we know that book is very important for all of us. The book Intelligent Collaborative e-Learning Systems and Applications (Studies in Computational Intelligence) has been making you to know about other understanding and of course you can take more information. It is quite advantages for you. The guide Intelligent Collaborative e-Learning Systems and Applications (Studies in Computational Intelligence) is not only giving you much more new information but also to become your friend when you sense bored. You can spend your own spend time to read your guide. Try to make relationship together with the book Intelligent Collaborative e-Learning Systems and Applications (Studies in Computational Intelligence). You never feel lose out for everything when you read some books.

Lorenzo Maskell:

The publication untitled Intelligent Collaborative e-Learning Systems and Applications (Studies in Computational Intelligence) is the e-book that recommended to you you just read. You can see the quality of the publication content that will be shown to anyone. The language that writer use to explained their ideas are easily to understand. The author was did a lot of investigation when write the book, to ensure the information that they share to your account is absolutely accurate. You also might get the e-book of Intelligent Collaborative e-Learning Systems and Applications (Studies in Computational Intelligence) from the publisher to make you considerably more enjoy free time.

Jim Molnar:

Don't be worry if you are afraid that this book will certainly filled the space in your house, you will get it in e-book technique, more simple and reachable. That Intelligent Collaborative e-Learning Systems and Applications (Studies in Computational Intelligence) can give you a lot of pals because by you checking out this one book you have thing that they don't and make anyone more like an interesting person. This specific book can be one of one step for you to get success. This reserve offer you information that probably your friend doesn't know, by knowing more than other make you to be great individuals. So , why hesitate? We need to have Intelligent Collaborative e-Learning Systems and Applications (Studies in Computational Intelligence).
