

Recovery from Disaster (Routledge Studies in Hazards, Disaster Risk and Climate Change)

By Ian Davis, David Alexander

Recovery from Disaster (Routledge Studies in Hazards, Disaster Risk and Climate Change) By Ian Davis, David Alexander

Disasters can dominate newspaper headlines and fill our TV screens with relief appeals, but the complex long-term challenge of recovery?providing shelter, rebuilding safe dwellings, restoring livelihoods and shattered lives?generally fails to attract the attention of the public and most agencies. On average 650 disasters occur each year. They affect more than 200 million people and cause \$166 trillion of damage. Climate change, population growth and urbanisation are likely to intensify further the impact of natural disasters and add to reconstruction needs. *Recovery from Disaster* explores the field and provides a concise, comprehensive source of knowledge for academics, planners, architects, engineers, construction managers, relief and development officials and reconstruction planners involved with all sectors of recovery, including shelter and rebuilding. With almost 80 years of first-hand experience of disaster recovery between them, Ian Davis (an architect) and David Alexander (a geographer) draw substantially from first-hand experiences in a variety of recovery situations in China, Haiti, Italy, Japan, New Zealand, Pakistan, the Philippines and the USA.

The volume is further enriched by two important and unique features: 21 models of disaster recovery are presented, seven of which were specifically developed for the book. The second feature is a survey of expert opinion about the nature of effective disaster recovery?the first of its kind. More than 50 responses are provided in full, along with an analysis that integrates them with the theories that underpin them. By providing a framework and models for future study and applications, Davis and Alexander seek both to advance the field and to provide a much-needed reference work for decision makers. With a broad perspective derived from the authors' roles held as university professors, researchers, trainers, consultants, NGO directors and advisors to governments and UN agencies, this comprehensive guide will be invaluable for practitioners and students of disaster management.

Editorial Review

Review

"Those involved in recovery after disaster are often too busy to document lessons learned and hardly ever able to return later to assess the long-term impact of their projects. To see Ian and David tap into over 40 years of recovery experience to produce truly independent lessons and suggestions for a way forward is extraordinary. *Recovery from Disaster* provides readers with a wealth of learning from the past and new ways of looking at that through a wide range of models. The book should be of great benefit to those currently involved in post-disaster work." - Theo Schilderman

About the Author

Ian Davis is currently Senior Professor in Disaster Risk Management for Sustainable Development in Lund University, Sweden and Visiting Professor in Cranfield, Oxford Brookes and Kyoto Universities.

David Alexander is Professor of Accounting at the University of Birmingham and a former senior examiner for one of the major UK accounting bodies.

Users Review

From reader reviews:

Nancy Jackson:

Do you have something that you like such as book? The e-book lovers usually prefer to choose book like comic, brief story and the biggest some may be novel. Now, why not trying Recovery from Disaster (Routledge Studies in Hazards, Disaster Risk and Climate Change) that give your fun preference will be satisfied by means of reading this book. Reading habit all over the world can be said as the method for people to know world far better then how they react when it comes to the world. It can't be explained constantly that reading routine only for the geeky individual but for all of you who wants to always be success person. So , for all of you who want to start reading as your good habit, you are able to pick Recovery from Disaster (Routledge Studies in Hazards, Disaster Risk and Climate Change) become your own personal starter.

Rhonda Joiner:

The book untitled Recovery from Disaster (Routledge Studies in Hazards, Disaster Risk and Climate Change) contain a lot of information on the idea. The writer explains the woman idea with easy way. The language is very clear to see all the people, so do not necessarily worry, you can easy to read it. The book was published by famous author. If you want to buy the e-book, you can start their official web-site along with order it. Have a nice examine.

Chad Davis:

As we know that book is significant thing to add our understanding for everything. By a guide we can know everything we would like. A book is a group of written, printed, illustrated or maybe blank sheet. Every year ended up being exactly added. This reserve Recovery from Disaster (Routledge Studies in Hazards, Disaster Risk and Climate Change) was filled concerning science. Spend your free time to add your knowledge about your scientific research competence. Some people has distinct feel when they reading some sort of book. If you know how big benefit from a book, you can feel enjoy to read a reserve. In the modern era like today, many ways to get book that you wanted.

James McNally:

As a student exactly feel bored for you to reading. If their teacher inquired them to go to the library or even make summary for some reserve, they are complained. Just tiny students that has reading's spirit or real their hobby. They just do what the teacher want, like asked to go to the library. They go to right now there but nothing reading really. Any students feel that reading is not important, boring in addition to can't see colorful images on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this age, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this Recovery from Disaster (Routledge Studies in Hazards, Disaster Risk and Climate Change) can make you experience more interested to read.
