Data for Biochemical Research By Rex M. C. Dawson, Daphne C. Elliott, William H. Elliott, K. M. Jones

Fully updated, this new edition supplies researchers with precise information in tabular form about the compounds, reagents, and techniques most frequently used in laboratory work. For the new edition, data have been rearranged to improve their display, many obscure compounds have been deleted, and many new compounds and techniques added.

Editorial Review

Review

"Contains a large amount of useful information in clear tabular form...A useful addition to the bookshelf of any laboratory worker in biochemistry and related areas."--*Clinical Medicine* (on 2nd edition)

"A judicious, excellent selection of the data...Highly recommended as a standard reference source in biochemical research."--*Journal of Histochemistry and Cytochemistry* (on 2nd edition)

"This well known laboratory data source has been fully revised and updated....The preceding editions have proved to be excellent for looking up specific data and facts that require quick checking....This new edition will prove to be an equally valuable bible."--*International Journal of Biochemistry*

About the Author

Rex M. C. Dawson is formerly at ARC Institute of Animal Physiology, Babraham, Cambridge. Daphne C. Elliott is at Flinders University, South Australia. William H. Elliott is at University of Adelaide. K.M. Jones is at University of Leicester.

Users Review

From reader reviews:

Carol Witt:

What do you concerning book? It is not important with you? Or just adding material when you need something to explain what your own problem? How about your extra time? Or are you busy man or woman? If you don't have spare time to perform others business, it is make one feel bored faster. And you have free time? What did you do? Everybody has many questions above. They have to answer that question mainly because just their can do which. It said that about e-book. Book is familiar on every person. Yes, it is suitable. Because start from on kindergarten until university need that Data for Biochemical Research to read.

Kevin Kennard:

As people who live in often the modest era should be up-date about what going on or information even knowledge to make these people keep up with the era that is certainly always change and move forward. Some of you maybe will certainly update themselves by studying books. It is a good choice to suit your needs but the problems coming to an individual is you don't know what one you should start with. This Data

for Biochemical Research is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and need in this era.

Kathleen King:

People live in this new day time of lifestyle always attempt to and must have the extra time or they will get large amount of stress from both daily life and work. So , once we ask do people have extra time, we will say absolutely sure. People is human not just a robot. Then we question again, what kind of activity are there when the spare time coming to anyone of course your answer can unlimited right. Then ever try this one, reading books. It can be your alternative in spending your spare time, typically the book you have read is usually Data for Biochemical Research.

George Miller:

What is your hobby? Have you heard in which question when you got learners? We believe that that query was given by teacher for their students. Many kinds of hobby, Every individual has different hobby. And you also know that little person similar to reading or as studying become their hobby. You have to know that reading is very important in addition to book as to be the matter. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You get good news or update regarding something by book. Numerous books that can you choose to adopt be your object. One of them is this Data for Biochemical Research.
