The Experimenters: Chance and Design at Black Mountain College By Eva Díaz

In the years immediately following World War II, Black Mountain College, an unaccredited school in rural Appalachia, became a vital hub of cultural innovation. Practically every major artistic figure of the mid-twentieth century spent some time there: Merce Cunningham, Ray Johnson, Franz Kline, Willem and Elaine de Kooning, Robert Motherwell, Robert Rauschenberg, Dorothea Rockburne, Aaron Siskind, Cy Twombly—the list goes on and on. Yet scholars have tended to view these artists' time at the College as little more than prologue, a step on their way to greatness. With *The Experimenters*, Eva Díaz reveals the importance of Black Mountain College—and especially of three key teachers, Josef Albers, John Cage, and R. Buckminster Fuller—to be much greater than that.

Díaz's focus is on experimentation. Albers, Cage, and Fuller, she shows, taught new models of art making that favored testing procedures rather than personal expression. These methodologies represented incipient directions for postwar art practice, elements of which would be sampled, and often wholly adopted, by Black Mountain students and subsequent practitioners. The resulting works, which interrelate art and life in a way that imbues these projects with crucial relevance, not only reconfigured the relationships among chance, order, and design—they helped redefine what artistic practice was, and could be, for future generations.

Offering a bold, compelling new angle on some of the most widely studied creative figures of modern times, *The Experimenters* does nothing less than rewrite the story of art in the mid-twentieth century.

Editorial Review

Review

“What links systems theorist and architect R. Buckminster Fuller with artistic innovators such as Josef Albers and John Cage? The answer is Black Mountain College, North Carolina. . . . As art historian Eva Díaz reveals in this engrossing study, their explorations in materials, form, chance, and indeterminacy were never less than electrifying. Her sympathetic portrait of Fuller as a utopian saving the world through geodesic geometry is particularly assured.”

(Nature)

“Insightful. . . . What distinguishes this book is Díaz’s lucid, comprehensive explanations of the ways in which Albers, Cage, and Fuller employed experimentation, or chance, and even failure as agents to advance perception in art specifically and, more broadly, to improve society and the body politic. . . . Highly recommended.”

(Choice)

“With well-developed prose and a good narrative, Díaz excels at providing context and content for an important story of experimentation on this campus and in subsequent locations inspired or directly impacted by the Black Mountain College approach to education.”

(Journal of Southern History)

“Highly enjoyable and even inspirational for anyone interested in art practice or simply the power of challenging accepted ways of thinking. . . . Reminds us that the restless spirit of experimentation is often best fostered in environments that expose the rules governing life and art before pushing us, in a collective effort, to break them.”

(MAKE Literary Magazine)

“Provides readers with clarity and elucidation about a college, three of its professors and an outside-the-mainstream educational experience. . . . Engaging.”

(New York-Pennsylvania Collector)

“Terrific. Black Mountain College has long been a lodestone for those interested in alternative educational models and in artistic innovation. Nevertheless, the major historical literature on the College still rests on largely anecdotal histories, with a tendency to jaunty optimism in lieu of criticality. There is nothing quite like *The Experimenters* out there—not on Black Mountain College, not on art making, and not on pedagogy.”

(Judith Rodenbeck, Sarah Lawrence College)

“By parsing three different versions of experimentation—performed by Josef Albers, John Cage, and Buckminster Fuller—Díaz shows us how their individual efforts were part of a shared commitment to art’s capacity to reinvent the world, to alter how we see, experience, and shape it in our own image. In the name of experimentation each of the artists suspended, if only for a moment, the metrics of failure and success, and replaced them instead with the values of intellectual pleasure, expanded sensory experiences, and aesthetic innovation. While the book is undoubtedly a historical account of a particular time and place, it is also a road map for many paths that, while not taken, still remain open.”

(Helen Molesworth, Museum of Contemporary Art, Los Angeles)

“In this highly evocative and well-executed study, Díaz explores the innovative pedagogical practices that were developed at Black Mountain College in its heyday. Respectful of the distinct teaching methods of the College’s most notable faculty, Diaz nonetheless finds a common experimental basis to the artworks and inventions produced by their students in the late 1940s and early 1950s. *The Experimenters* is nuanced, erudite, and intellectually wide-ranging. It will be essential reading for anyone interested in the development of mid-twentieth-century art in the United States.”

(Alexander Alberro, author of *Conceptual Art and the Politics of Publicity*)

About the Author

Eva Díaz is assistant professor of art history at the Pratt Institute.

Users Review

From reader reviews:

Luz Davis:

In this 21st one hundred year, people become competitive in each and every way. By being competitive now, people have do something to make these survives, being in the middle of often the crowded place and notice by surrounding. One thing that at times many people have underestimated it for a while is reading. Yeah, by reading a book your ability to survive increase then having chance to stand up than other is high. For you personally who want to start reading the book, we give you that *The Experimenters: Chance and Design at Black Mountain College* book as beginner and daily reading publication. Why, because this book is more than just a book.

Scottie Kelly:

Nowadays reading books become more than want or need but also be a life style. This reading addiction give you lot of advantages. The huge benefits you got of course the knowledge your information inside the book which improve your knowledge and information. The information you get based on what kind of publication you read, if you want get more knowledge just go with education books but if you want sense happy read one having theme for entertaining for instance comic or novel. The particular *The Experimenters: Chance and Design at Black Mountain College* is kind of e-book which is giving the reader capricious experience.

Richard Daniels:

This book untitled *The Experimenters: Chance and Design at Black Mountain College* to be one of several books this best seller in this year, that's because when you read this publication you can get a lot of benefit on it. You will easily to buy this specific book in the book store or you can order it by way of online. The publisher of the book sells the e-book too. It makes you more readily to read this book, as you can read this book in your Cell phone. So there is no reason to your account to past this book from your list.

Cherry Simard:

Does one one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Attempt to pick one book that you find out the inside because don't evaluate book by its include may doesn't work the following is difficult job because you are scared that the inside maybe not since fantastic as in the outside appearance likes. Maybe you answer might be The Experimenters: Chance and Design at Black Mountain College why because the excellent cover that make you consider concerning the content will not disappoint an individual. The inside or content is fantastic as the outside as well as cover. Your reading 6th sense will directly make suggestions to pick up this book.
