The Solar Economy: Renewable Energy for a Sustainable Global Future By Hermann Scheer

The global economy and our way of life are based on the exploitation of fossil fuels, which not only threaten massive environmental and social disruption through global warming but, at present rates of consumption, will run out within decades, causing huge industrial dislocation and economic collapse. Even before then, the conflicts it causes in the Middle East and elsewhere will be frighteningly exacerbated.

The alternative exists: renewable energy from renewable sources - above all, solar. Substituting renewable for fossil resources will take a new industrial revolution to avert the worst of the damage and establish a new international order.

It can be done, and it can be done in time. The Solar Economy, by one of the world's most effective analysts and advocates, lays out the blueprints, showing how the political, economic and technological challenges can be met using indigenous, renewable and universally available resources, and the enormous opportunities and benefits that will flow from doing so.

Editorial Review

Review

"A masterwork by the master advocate for solar." -- *Jeremy Leggett, author of 'The Carbon War'*

"This book is of the greatest importance for the future of mankind." -- *Günther Grass, winner of the Nobel Prize for Literature*

About the Author

Hermann Scheer is a member of the German parliament (the Bundestag) and Chairman of Eurosolar. One of the most active and influential campaigners for solar and renewable energy, he was awarded the Alternative Nobel Prize in 1999. [German edition, Solare Weltwirtschaft, published by Kunstmann Verlag, 2001; 25,000 copies sold.]

Users Review

From reader reviews:

Jennifer Phinney:

What do you about book? It is not important along with you? Or just adding material if you want something to explain what your own problem? How about your free time? Or are you busy particular person? If you don't have spare time to complete others business, it is make you feel bored faster. And you have extra time? What did you do? Everybody has many questions above. They need to answer that question because just their can do that. It said that about publication. Book is familiar on every person. Yes, it is proper. Because start from on pre-school until university need this specific The Solar Economy: Renewable Energy for a Sustainable Global Future to read.

Lawrence Richardson:

Reading a book tends to be new life style within this era globalization. With examining you can get a lot of information that could give you benefit in your life. Along with book everyone in this world can certainly share their idea. Textbooks can also inspire a lot of people. A lot of author can inspire their reader with their story or maybe their experience. Not only the storyline that share in the guides. But also they write about the data about something that you need instance. How to get the good score toefl, or how to teach children, there are many kinds of book which exist now. The authors in this world always try to improve their skill in writing, they also doing some exploration before they write for their book. One of them is this The Solar Economy: Renewable Energy for a Sustainable Global Future.

Victor Havens:

People live in this new moment of lifestyle always aim to and must have the free time or they will get lots of stress from both way of life and work. So , if we ask do people have time, we will say absolutely without a

doubt. People is human not just a robot. Then we question again, what kind of activity do you possess when the spare time coming to anyone of course your answer will unlimited right. Then do you try this one, reading textbooks. It can be your alternative throughout spending your spare time, the actual book you have read will be The Solar Economy: Renewable Energy for a Sustainable Global Future.

Robert Bowser:

Is it an individual who having spare time subsequently spend it whole day by simply watching television programs or just resting on the bed? Do you need something totally new? This The Solar Economy: Renewable Energy for a Sustainable Global Future can be the respond to, oh how comes? A fresh book you know. You are therefore out of date, spending your spare time by reading in this completely new era is common not a nerd activity. So what these textbooks have than the others?
