Editorial Review

Review

An advanced economy initiates and designs; a powerful economy consumes as well as creates so that it is not dependent on overseas customers. This book will show you how China's is becoming both. As Li Wuwei reminds us China is 'rich in historical and cultural resources'. But Chinese culture has more than that. More than any other people, Chinese believe in the transformative power of education. Like the Italians they are critical consumers and they are as enterprising as Anglo-America's protestant forbears. With this book Li Wuwei shows us how this devastating combination is being harnessed and gives us clues as to what this means for the country's - and the world's - future economic development. He is an influential man with the ear of power; the reader can be confident that what he writes reflects what decision-makers are thinking.
