Principles of Neuropsychology By Eric A. Zillmer, Mary V. Spiers

Written from a functional perspective, this text offers an applied, clinical, real-life focus and detailed information on neuropathology, clinical syndromes, brain theory, neuropsychological assessment, mind-brain issues, and methods of investigating the brain. Thorough without being encyclopedic, the text presents an appropriate balance of clinical neuropsychology (primary focus) and experimental neuropsychology (secondary focus). By covering the role of the brain in behaviors that range from those as simple as a reflex to those as complex as personality and religion, the authors challenge students to consider behavior from a broader biological perspective. The authors' creative, balanced approach combined with strong pedagogy, current scholarship, and extensive illustrations, positions the text above all competing resources.

Editorial Review

About the Author

Dr. Eric A. Zillmer received his Psy.D. from Florida Institute of Technology. He completed his internship training at Eastern Virginia Medical School, and also completed a two-year postdoctoral fellowship in neuropsychology at the University of Virginia Health Sciences Center. Currently, Dr. Zillmer is the Pacifico Professor of Neuropsychology at Drexel University where he teaches courses in neuropsychology, abnormal psychology, psychological assessment and sports psychology.

Dr. Mary V. Spiers received her Ph.D. in clinical psychology at the University of Alabama at Birmingham, where she specialized in medical psychology and neuropsychology. Currently Dr. Spiers is an associate professor of psychology at Drexel University and is also the former director of the Graduate Program in Clinical Psychology. She teaches courses in neuropsychology, neuropsychological assessment, tests and measurement, ethics and professional issues in psychology, models of memory in neuropsychology, and health psychology for women.

Users Review

From reader reviews:

Shannon Silva:

What do you regarding book? It is not important together with you? Or just adding material when you want something to explain what the one you have problem? How about your spare time? Or are you busy particular person? If you don't have spare time to accomplish others business, it is make one feel bored faster. And you have time? What did you do? All people has many questions above. The doctor has to answer that question due to the fact just their can do that will. It said that about e-book. Book is familiar on every person. Yes, it is right. Because start from on pre-school until university need this particular Principles of Neuropsychology to read.

Greg Little:

Nowadays reading books become more and more than want or need but also get a life style. This reading behavior give you lot of advantages. The benefits you got of course the knowledge the particular information inside the book that will improve your knowledge and information. The information you get based on what kind of book you read, if you want have more knowledge just go with education books but if you want really feel happy read one along with theme for entertaining like comic or novel. Typically the Principles of Neuropsychology is kind of book which is giving the reader erratic experience.

Dustin Kellett:

Your reading 6th sense will not betray an individual, why because this Principles of Neuropsychology publication written by well-known writer who really knows well how to make book that could be understand by anyone who else read the book. Written within good manner for you, still dripping wet every ideas and

composing skill only for eliminate your own personal hunger then you still doubt Principles of Neuropsychology as good book not just by the cover but also by the content. This is one publication that can break don't determine book by its handle, so do you still needing another sixth sense to pick this specific!? Oh come on your looking at sixth sense already said so why you have to listening to an additional sixth sense.

Kirk Banks:

Are you kind of active person, only have 10 or perhaps 15 minute in your morning to upgrading your mind talent or thinking skill possibly analytical thinking? Then you are experiencing problem with the book in comparison with can satisfy your short space of time to read it because this time you only find publication that need more time to be examine. Principles of Neuropsychology can be your answer since it can be read by you who have those short extra time problems.
