Processor Architecture: From Dataflow to Superscalar and Beyond

By Jurij Silc, Borut Robic, Theo Ungerer

Processor Architecture: From Dataflow to Superscalar and Beyond By Jurij Silc, Borut Robic, Theo Ungerer

A survey of architectural mechanisms and implementation techniques for exploiting fine- and coarse-grained parallelism within microprocessors. Beginning with a review of past techniques, the monograph provides a comprehensive account of state-of-the-art techniques used in microprocessors, covering both the concepts involved and implementations in sample processors. The whole is rounded off with a thorough review of the research techniques that will lead to future microprocessors. XXXXXXX Neuer Text This monograph surveys architectural mechanisms and implementation techniques for exploiting fine-grained and coarse-grained parallelism within microprocessors. It presents a comprehensive account of state-of-the-art techniques used in microprocessors that covers both the concepts involved and possible implementations. The authors also provide application-oriented methods and a thorough review of the research techniques that will lead to the development of future processors.

Editorial Review

From the Back Cover
This monograph surveys architectural mechanisms and implementation techniques for exploiting fine-grained and coarse-grained parallelism within microprocessors. It starts with a review of past techniques, continues with a comprehensive account of state-of-the-art techniques used in microprocessors that covers both the concepts involved and implementations in sample processors, and ends with a thorough review of the research techniques that will lead to future microprocessors.

Users Review

From reader reviews:

Ward Beaver:

Have you spare time for just a day? What do you do when you have a lot more or little spare time? Yes, you can choose the suitable activity intended for spend your time. Any person spent their very own spare time to take a go walking, shopping, or went to often the Mall. How about open or maybe read a book entitled Processor Architecture: From Dataflow to Superscalar and Beyond? Maybe it is to be best activity for you. You realize beside you can spend your time using your favorite's book, you can better than before. Do you agree with it has the opinion or you have different opinion?

Silvia Smedley:

The particular book Processor Architecture: From Dataflow to Superscalar and Beyond will bring you to definitely the new experience of reading some sort of book. The author style to spell out the idea is very unique. In the event you try to find new book you just read, this book very ideal to you. The book Processor Architecture: From Dataflow to Superscalar and Beyond is much recommended to you you just read. You can also get the e-book in the official web site, so you can more readily to read the book.

Barry Trusty:

People live in this new moment of lifestyle always try to and must have the free time or they will get wide range of stress from both way of life and work. So , if we ask do people have spare time, we will say absolutely sure. People is human not really a robot. Then we consult again, what kind of activity are there when the spare time coming to a person of course your answer may unlimited right. Then ever try this one, reading books. It can be your alternative throughout spending your spare time, the actual book you have read is usually Processor Architecture: From Dataflow to Superscalar and Beyond.

Marc Medina:

Do you like reading a publication? Confuse to looking for your preferred book? Or your book seemed to be rare? Why so many question for the book? But virtually any people feel that they enjoy with regard to reading. Some people likes reading, not only science book but novel and Processor Architecture: From Dataflow to Superscalar and Beyond or maybe others sources were given information for you. After you know how the fantastic a book, you feel would like to read more and more. Science publication was created for teacher or maybe students especially. Those guides are helping them to put their knowledge. In various other case, beside science guide, any other book likes Processor Architecture: From Dataflow to Superscalar and Beyond to make your spare time more colorful. Many types of book like this.
