The Parathyroids, Third Edition: Basic and Clinical Concepts From Academic Press

The third edition of *The Parathyroids*, led by a new stellar editorial team, has been thoroughly updated to reflect the considerable advances in just about every aspect of PTH biology over the past decade. It continues to be the authoritative reference that spans the basic science of parathyroid hormone treatment to major clinical disorders in a superb, single compendium. This translational resource is invaluable to graduate students, fellows, researchers, and research clinicians in the fields of endocrinology, bone biology, osteology, and rheumatology.

- Contains chapters and information on noninvasive imaging, fracture healing, secondary diseases such as CKD, Vitamin D, cell signaling pathways, vascular calcification, as well as advances in genetics/genomics
- Includes essential updates on the critical importance of Vitamin D insufficiency and its relationship to secondary hyperparathyroidism
- Offers new insights into the underlying mechanisms of parathyroid hormone actions on osteocytes and sclerostin
- Examines essential updates in the understanding of secondary hyperparathyroidism associated with chronic kidney disease, fracture healing, and vascular disease

Editorial Review

Review

"...a comprehensive source of information that most endocrinologists will want to have on their bookshelves." --**Trends in Endocrinology And Metabolism, 2003**

"It represents a significant contribution to the field, and likely will continue to do so for many editions." --
Bart L. Clarke, Mayo Clinic, for Doody Publishing Reviews, 2002

About the Author

Dr. John P. Bilezikian, the Dorothy L. and Daniel H. Silberberg Professor of Medicine and Professor of Pharmacology at the College of Physicians & Surgeons, Columbia University is Chief of the Division of Endocrinology and Director of the Metabolic Bone Diseases Program at Columbia University Medical Center. Dr. Bilezikian received his undergraduate training at Harvard College and his medical training at the College of Physicians & Surgeons. He completed four years of house staff training (internship, residency and Chief Residency) on the Medical Service at Columbia Presbyterian Medical Center. Dr. Bilezikian received his training in Metabolic Bone Diseases and in Endocrinology at the NIH in the Mineral Metabolism Branch under the tutelage of Dr. Gerald Aurbach.

Dr. Marcus is Professor-Emeritus, Stanford University, where he served on the full-time medical faculty for almost 25 years, before joining the Emeritus faculty in 2001. At Stanford, he was located at the Veterans Affairs Medical Center, Palo Alto California, where he served as Director of the Aging Study Unit of the Geriatrics Research, Education, & Clinical Center from 1982-2001. Dr. Marcus enjoyed a long career as a clinical investigator in the fields of bone and mineral metabolism and osteoporosis medicine. His own research interests included diagnosis and therapy of primary hyperpara-thyroidism, interactions of the parathyroid-vitamin D axis with estrogen, age-related changes in the growth hormone-IGF axis, effects of growth hormone replacement for older men and women, metabolic and musculoskeletal effects of resistance exercise in older men and women, adolescent bone acquisition, and osteoporosis therapeutics. Dr. Marcus' laboratory was a study site for many of the pivotal clinical trials in the osteoporosis field. These include the NIH Post-menopausal Estrogen/Progestin Interventions Trial (PEPI), Merck's Fracture Intervention Trial (FIT), Lilly's Multiple Outcomes of Raloxifene Intervention (MORE), and Lilly's registration trial of recombinant PTH(1-34) in the treatment of postmenopausal women with osteoporosis. In 2001, Dr. Marcus joined the US Affiliate of Eli Lilly & Company to support Lilly's program in Osteoporosis and Skeletal Medicine. From 2003 until his retirement from Lilly in 2008, Dr. Marcus was the lead physician for the Forteo team at Lilly. He has published more than 150 research papers, editorials, and reviews. Dr. Marcus served as President of the American Society for Bone & Mineral Research in 2000-2001.

Dr. Michael A. Levine is Chief of Endocrinology and Diabetes and Director of the Center for Bone Health at The Children's Hospital of Philadelphia. Dr. Levine holds the Lester Baker Endowed Chair and is Professor of Pediatrics and Medicine at the University of Pennsylvania Perelman School of Medicine. Dr. Levine's research focuses on the genetic basis of disorders of bone and mineral metabolism and complements his clinical expertise in endocrine diseases that affect bone and mineral metabolism. His approach is to apply molecular and genetic tools to analyze the basis of altered hormone action, particularly in G protein-coupled signal transduction systems that affect growth and development. He has identified or contributed to the

molecular basis of several inherited disorders of bone and mineral metabolism, including familial hypoparathyroidism, pseudohypoparathyroidism, cherubism, and the McCune Albright syndrome. His research interests now extend to the molecular events that control embryological development of the parathyroid glands and genetic modifiers of vitamin D action.

Users Review

From reader reviews:

Jessica Bradsher:

Reading a publication can be one of a lot of exercise that everyone in the world loves. Do you like reading book and so. There are a lot of reasons why people enjoyed. First reading a e-book will give you a lot of new data. When you read a book you will get new information since book is one of a number of ways to share the information or their idea. Second, examining a book will make an individual more imaginative. When you studying a book especially tale fantasy book the author will bring someone to imagine the story how the characters do it anything. Third, you can share your knowledge to other individuals. When you read this The Parathyroids, Third Edition: Basic and Clinical Concepts, it is possible to tells your family, friends and soon about yours e-book. Your knowledge can inspire others, make them reading a publication.

Guadalupe Winn:

Are you kind of occupied person, only have 10 as well as 15 minute in your moment to upgrading your mind expertise or thinking skill perhaps analytical thinking? Then you are experiencing problem with the book when compared with can satisfy your short time to read it because all of this time you only find reserve that need more time to be study. The Parathyroids, Third Edition: Basic and Clinical Concepts can be your answer as it can be read by a person who have those short time problems.

John Lyons:

Don't be worry in case you are afraid that this book will filled the space in your house, you will get it in e-book approach, more simple and reachable. That The Parathyroids, Third Edition: Basic and Clinical Concepts can give you a lot of close friends because by you investigating this one book you have thing that they don't and make a person more like an interesting person. This particular book can be one of one step for you to get success. This guide offer you information that maybe your friend doesn't learn, by knowing more than other make you to be great folks. So , why hesitate? Let me have The Parathyroids, Third Edition: Basic and Clinical Concepts.

Marvin Ober:

Some individuals said that they feel weary when they reading a publication. They are directly felt that when they get a half portions of the book. You can choose typically the book The Parathyroids, Third Edition: Basic and Clinical Concepts to make your current reading is interesting. Your own personal skill of reading proficiency is developing when you such as reading. Try to choose simple book to make you enjoy to study it and mingle the impression about book and looking at especially. It is to be very first opinion for you to like

to open up a book and go through it. Beside that the publication The Parathyroids, Third Edition: Basic and Clinical Concepts can to be your new friend when you're experience alone and confuse with the information must you're doing of their time.
