**Taphonomy: A Process Approach (Cambridge Paleobiology Series)** By  
Ronald E. Martin

This book offers a comprehensive review of the entire field of taphonomy, the science of fossil preservation. It describes the formation of plant and animal fossils in oceanic, terrestrial and river settings and how this affects deciphering the ecology and extinction of past lifeforms and the environments in which they lived. Coverage emphasizes a process approach to the subject and reviews the taphonomic behavior of all important taxa, both plant and animal. The book will be of main interest to advanced students and professionals working in paleontology, stratigraphy, sedimentology, climate modeling and biogeochemistry. It will also appeal to anyone interested in the preservation of fossils and the formation of fossil assemblages.

### **Editorial Review**

#### **Review**

"Taphonomy: A Process Approach is a good measure of how far taphonomy and paleontology have come in the past decades. From case studies to grand syntheses, from documenting patterns to understanding processes, and from bemoaning the quality of fossil record to putting meaningful confidence limits on fossil data...Taphonomy: A Process Approach is the first review of this discipline that pulls together case studies from marine microfossils, marine invertebrates, vertebrates, plants, and pollen." *Science*

"An outstanding compendium and organized summary of an inordinate number of references...I strongly recommend this book to all advanced students of paleontology, stratigraphy, sedimentology, and Earth history, in general. It is reasonably priced, rather well illustrated, and summarizes just about all the major ideas of taphonomy...the author and the editors are to be commended on a rather finely crafted text with few errors. This is a first attempt to pull together such a wide array of disparate information, and Ron Martin is to be congratulated on having achieved such a formidable goal in a timely fashion." *Journal of Geoscience Education*

### **Users Review**

#### **From reader reviews:**

##### **John Loya:**

Do you one of people who can't read gratifying if the sentence chained in the straightway, hold on guys that aren't like that. This Taphonomy: A Process Approach (Cambridge Paleobiology Series) book is readable by means of you who hate those straight word style. You will find the facts here are arrange for enjoyable looking at experience without leaving actually decrease the knowledge that want to offer to you. The writer regarding Taphonomy: A Process Approach (Cambridge Paleobiology Series) content conveys thinking easily to understand by lots of people. The printed and e-book are not different in the written content but it just different in the form of it. So , do you nonetheless thinking Taphonomy: A Process Approach (Cambridge Paleobiology Series) is not loveable to be your top collection reading book?

##### **Susan Hare:**

Playing with family in a park, coming to see the sea world or hanging out with good friends is thing that usually you will have done when you have spare time, then why you don't try matter that really opposite from that. One activity that make you not sense tired but still relaxing, trilling like on roller coaster you have been ride on and with addition details. Even you love Taphonomy: A Process Approach (Cambridge Paleobiology Series), you could enjoy both. It is excellent combination right, you still wish to miss it? What kind of hangout type is it? Oh can occur its mind hangout fellas. What? Still don't buy it, oh come on its identified as reading friends.

**Virginia Gauvin:**

Many people spending their time period by playing outside using friends, fun activity having family or just watching TV the entire day. You can have new activity to invest your whole day by reading a book. Ugh, you think reading a book will surely hard because you have to bring the book everywhere? It alright you can have the e-book, having everywhere you want in your Touch screen phone. Like Taphonomy: A Process Approach (Cambridge Paleobiology Series) which is keeping the e-book version. So , try out this book? Let's view.

**Donald Foster:**

A lot of people said that they feel bored when they reading a guide. They are directly felt this when they get a half parts of the book. You can choose the particular book Taphonomy: A Process Approach (Cambridge Paleobiology Series) to make your reading is interesting. Your own skill of reading ability is developing when you just like reading. Try to choose basic book to make you enjoy to learn it and mingle the feeling about book and studying especially. It is to be initially opinion for you to like to available a book and examine it. Beside that the guide Taphonomy: A Process Approach (Cambridge Paleobiology Series) can to be your friend when you're truly feel alone and confuse with the information must you're doing of these time.
